CROCHET PATTERN

Cream Snowflake Hanging Ornament

A starched lace crochet snowflake on a beaded cord with a tassel

SKILL LEVEL	FINISHED SIZE	YARN	HOOK
Intermediate	≈ 17 cm (6.7 in) plus an 8 cm loop	DK cotton · 1 colour	2.5 mm (US B/1–C/2)

A six-arm lace snowflake in three joined rounds — dc ring, dc and chain spaces, then picot-tipped arms — starched flat and hung on a beaded cord above a cream tassel.

Status: ready for a sample knit — every size checked by code, not yet test-knitted

QA report for the designer — not part of the pattern you sell or share.

MATERIALS · GAUGE · ABBREVIATIONS

Before You Begin

Materials & Tools

Yarn A	DK (#3) cotton, cream or white — approx. 14 m (16 yd), about 7 g — 1 ball of 50 g (about 115 m) is enough
Hook	2.5 mm (US B/1–C/2)
Beads	3 gold-tone beads 6 mm (hole at least 2.5 mm); 2 natural wooden beads 12 mm (hole at least 3 mm). Both cord strands must pass through each bead together — test before you start.
Notions	fabric starch or white craft glue, rust-proof pins, blocking board, tapestry needle, stiff card, scissors

Gauge

GAUGE 22 sc and 24 rows/rnds = 10 cm (4 in) in single crochet with a 2.5 mm hook. Gauge is not critical for an ornament, but work firmly so that stuffing does not show and flat pieces keep their shape; sizes depend on your tension.

How to swatch: Optional density check: ch 12, then work 10 rows of sc on 11 sts. The square should measure about 5 cm (2 in) wide and 4 cm (1.6 in) tall. If it is larger or you see gaps between stitches, use a smaller hook.

Finished Measurements

Part	Width	Height
Snowflake (blocked, tip to tip)	≈ 5.6 cm (2.2 in)	≈ 6.4 cm (2.5 in)
Tassel	–	9 cm (3.5 in)

CHOOSING A SIZE One size. For a larger ornament use light worsted (#4) cotton and a 3 mm hook; for a smaller one use sport-weight cotton and a 2 mm hook. Beads and tassel length can be changed freely.

Abbreviations (US terms)

ch	chain	**sp**	space
sc	single crochet	**st(s)**	stitch(es)
sl st	slip stitch	**rnd(s)**	round(s)
dc	double crochet	**rep**	repeat
MR	magic ring		

Pattern Notes

- Joined rounds (where a round says "Join"): start the round with ch 1, which does not count as a stitch, and finish it with a sl st into the first stitch.
- US crochet terms are used throughout.
- The number in parentheses at the end of a row or round is the number of stitches you should have when it is finished. Tick the box when you finish each step.
- Rows: ch 1 at the start of a row does not count as a stitch; rounds worked in a magic ring are worked in continuous spirals unless the round says "join".
- Leave a 20 cm (8 in) tail when you fasten off a piece that will be sewn; weave in all other ends on the wrong side as you go.

Techniques

Magic ring (MR) — Wrap the yarn twice around two fingers, insert the hook under both strands, pull up a loop and ch 1 (does not count as a stitch). Work the stitches of Rnd 1 over both strands, then pull the tail firmly to close the centre.

Picot — Ch 3, then sl st into the 3rd ch from the hook (the first of the three chains).

Tassel neck wrap — Lay a 5 cm loop of the wrapping strand along the tassel, pointing down. Wrap the long end tightly around tassel and loop, from the top down. Pass the end through the loop, then pull the short tail at the top until the loop disappears under the wraps. Trim both ends and hide them in the skirt.

YARN A (CREAM) · MAKE 1

Snowflake

Three joined rounds: a dc ring, a round of dc and ch-2 spaces, and a round with six arms (each ending in a three-picot tip) alternating with six small picot points.

☐	**Rnd 1**	Ch 3 (counts as the first dc), 11 dc in MR. Join with a sl st to the top of the ch-3.	**(12)**
☐	**Rnd 2**	Ch 5 (counts as dc + ch 2), *dc in next dc, ch 2*; rep from * 10 more times. Join with a sl st to the 3rd ch of the ch-5.	**(12 dc, 12 ch-2 sps)**
☐	**Rnd 3**	Sl st into the first ch-2 sp. *In this ch-2 sp work the arm: sc, ch 6, sl st in 4th ch from hook, (ch 3, sl st in the same ch) twice, sl st in each of the next 2 ch, sc in the same ch-2 sp. In the next ch-2 sp work a small point: sc, picot, sc*; rep from * 5 more times. Join with a sl st to the first sc and fasten off.	**(6 arms, 6 small points)**

BLOCKING Pin the snowflake on a board, pinning every arm tip and each tip picot. Spray with fabric starch (or dab on a mix of 1 part white craft glue and 1 part water) and let it dry completely before unpinning.

YARN A (CREAM)

Tassel

The tassel is made first: the hanging cord is tied into its top, so the cord runs through the whole ornament and is anchored in the tassel.

☐	**Step 1**	Cut a piece of stiff card 19 cm (7.5 in) tall. Wrap Yarn A (cream) around the card 40 times, keeping the wraps side by side and not too tight. Cut the yarn at the bottom edge.
☐	**Step 2**	Cut the hanging cord: one 90 cm (35 in) length of Yarn A. Slide it under all the wraps along the top edge of the card so that its middle sits there, and tie it in a tight square knot around the wraps. Both cord ends now point upwards.
☐	**Step 3**	Cut through all the wraps along the bottom edge of the card and remove the card. Let the strands hang down from the cord knot.
☐	**Step 4**	Tassel neck: cut a 70 cm length of Yarn A. Measure 2 cm down from the top fold and wrap it tightly 8 times around the bundle (see Tassel neck wrap in Techniques).
☐	**Step 5**	Trim the skirt evenly to 9 cm (3.5 in) from the top fold. Hold it over steam (or dampen it) and comb the strands straight with your fingers; let it dry hanging.

Assembly & Finishing

- Thread both cord ends together through a large-eye tapestry needle (or a bead needle with a big eye). Work upwards from the tassel.
- String, from the tassel upwards: 1 wooden bead → 1 gold bead → the snowflake → 1 gold bead → 1 wooden bead → 1 gold bead.
- Snowflake: hang it with one arm pointing up. Pass the needle through the chain stem of the bottom arm, weave through 3 dc of the centre ring on the back, and out through the chain stem of the top arm.
- Push everything down snugly onto the tassel so there are no gaps. Holding both cord ends together, tie one overhand knot right above the top bead to lock the stack.
- Hanging loop: tie the two cord ends together with a square knot so that the loop measures 8 cm (3 in) from the overhand knot to the top. Trim the ends to 5 mm and add a drop of fabric glue to the knot if you like.

SAFETY This is a decoration, not a toy, and not suitable for children under 3 years. Beads and cords are a choking and strangling hazard: hang it out of reach of babies, young children and pets.

Checkpoints & Troubleshooting

Stop and count at these points — every number is the stitch count on your needle after that step, exactly as printed in the rows.

Piece	Count	One size
Snowflake	after: Rnd 1	12

If your count doesn't match

- **Count at every checkpoint.** One stitch out: look back to the last checkpoint for a missed or doubled increase or decrease and put it right there. A lifeline (a smooth thread run through a finished row) lets you rip back safely to a row you know is right.
- **Piece longer or shorter than expected for the rows:** your row gauge differs. Lengths are worked to the measurement given, so measure the piece flat, without stretching, and follow the cm.
- **Working in rounds:** place a marker at the start of the round and move it up every round — most count errors in rounds come from a lost round start.

APPENDIX

Photo Analysis & Assumptions

One product photo plus infographic steps; scale from the wooden beads.

HOW ACCURATE IS THIS? **Overall confidence: Medium.** Sizes are scaled from the photo using the 12 mm wooden beads as the reference; the photos look like rendered images, so stitch counts are a design reconstruction, not a count from a real sample. Make the piece once and compare before selling the pattern.

Quality status

Generation and verification are separate: the instructions come from a stitch-level model, and independent code checks every size. 'PASS' means verified by computation, not that a sample has been knitted.

Check	Result	Details
Math (stitch counts)	**PASS**	every step's count = previous + increases − decreases, for every size
Row execution	**NOT MODELLED**	add 'ops' to steps so rows can be executed by code
Construction & assembly	**PASS**	single piece closes correctly
Row-gauge sensitivity	**N/A**	every round is counted, nothing is worked to a length
Completeness & clarity	**PASS**	tech edit: 0 error(s), 0 note(s)
Design risk	**PASS**	no abrupt stitch jumps
Visual match to photo	**PASS**	4 feature(s) compared, 4 measured; all within ±5 % / exact counts; analysis confidence Medium
Evidence ledger	**PASS**	5 feature(s): 1 seen, 4 inferred, 0 design choice(s)
Yarn consumption	**WARNING**	based on area estimate
PDF text check	**PASS**	every stitch count of the model found in the PDF text
Customer wording	**PASS**	pattern text only — no QA, photo or test remarks
PDF rendering	**PASS**	all characters exist in the fonts; no text outside the page
Physical sample test	**NO**	no sample made yet — make the gauge swatch and, ideally, a sample

STATUS Release status: **READY_FOR_SAMPLE**. All computed checks pass. The pattern has not been knitted yet: swatch first, and treat sizes and yarn amounts as estimates until a sample confirms them.

What the photos show

Seen = visible in a photo; **Inferred** = deduced from what is visible; **Design choice** = not visible, chosen so the pattern is complete.

Feature	Evidence in photo	Conclusion	Basis
Centre	Infographic: ch 3 + 11 dc in MR (12 dc)	Rnd 1 as given	Seen · High
Second round	Infographic text is inconsistent (first st gets 2 dc)	Corrected: 12 dc each followed by ch 2	Inferred · High

Feature	Evidence in photo	Conclusion	Basis
Arms	6 arms with clustered picot tips and small points between them	6 arms with a 3-picot tip + 6 small picot points; the infographic's 12-space/6-point mismatch is resolved by alternating	Inferred · Medium
Hanging cord and beads	Cream cord loop above a gold–wood–gold bead stack; same stack below the piece	Cord tied into the tassel top and threaded up through beads and piece	Inferred · Medium
Tassel	Long full tassel with a rounded head and a wrapped neck	Wrapped-card tassel, about 40 wraps, neck wrapped 8 times	Inferred · Medium

Predicted result vs the photos

The finished piece predicted from the stitch counts and gauge, compared feature by feature with the photographs.

Feature	In the photos	This pattern gives	Match
Arms	6	6	Yes
Height : width	1.10	6.4 / 5.6 = 1.14	Yes
Gold beads	3 in the bead stacks	3	Yes
Wooden beads	2 in the bead stacks	2	Yes

Assumptions you may want to adjust

- The photographed side branches on each arm are simplified to a three-picot tip.

THANK YOU Thank you for making this ornament. Happy crocheting!
